

THERMOSTATS FOR RESIDENTIAL AND LIGHT COMMERCIAL APPLICATIONS

TSTATD4271GT
TSTATD4272GT

Features

- Full-Color Touchscreen
- WiFi-capable w/optional accessory
- Simple as you want Operation
- Up to 4 Heat / 2 Cool
- Gas Electric or Heat Pump
- Programmable or Non-Programmable
- Adjustable Timers & Deadbands
- Set-Point Limiting
- Programmable Fan
- Outdoor/Indoor Sensor Ready
- Choice of English, Spanish or French
- Hum/Dehum Functions (TSTATD4272GT only)

With the optional Touchscreen Assistant Software (free download from the web) there are additional features and enhancements available.

With this software you can:

- Program the time period schedule and configure installation settings using your computer, then upload data to one or multiple thermostats
- Dealers can use this application to import their logo and contact information to the thermostat.
 - This info is displayed when any Service Alert occurs
- Update firmware of thermostat as additional features and enhancements become available
- Sizes and positions photos for use as a digital picture frame slideshow and as custom background wallpaper for the home screen
- Create a template and program multiple stats

An SD card is required to upload the above information to the thermostat. The SD card is not included.

With an optional accessory these thermostats can also be accessed over the internet

The TSTATGAC-WF Skyport WiFi Key allows you to access Color Touchscreen thermostats over the internet via Skyport Cloud Services.

- Easy set up and no monthly charges
- 802.11 b/g wireless, LAN, Wi-Fi ready
- Plugs into the SD port on thermostat
- Locking clip included for security

Using the mobile app on virtually any mobile device, you can control the thermostat, from nearly any location, even from the couch at home.

Compatible with Apple iPhone®, iPod Touch®, iPad®, Blackberry® (10 OS only), Android®, Mac and PC devices. A Color Touchscreen thermostat with the TSTATGAC-WF Key and the Skyport mobile app allows you to:

- Manage multiple thermostats
- Monitor thermostat information, including system run time and current usage
- View alerts based on pre-configured notifications, such as: the home's inside temperature has gone above or below pre-set limits
- View the current weather and weather forecast for all thermostat locations
- Send text messages from the Skyport App or your computer to the thermostat display, such as reminders and notes
- Receive vital updates on the health of the systems

Please Note

The optional Touchscreen Assistant Software is not required to setup, configure or use the thermostat. It is only required to use the additional features outlined above.
